

Scottish Congenital Cardiac Network

The SCCN is a National Managed Clinical Network supported by Dr Hamish Walker, Lead Clinician (Adult); Dr Muhammad Walayat, Lead Clinician (Paediatric); newly appointed manager Brin Maki and Anna Gardiner, Coordinator.

Brin is very happy to have started in post as SCCN Manager and work is under way to convene a steering group which will set the priorities for this network. The inaugural meeting will take place in September.

The SCCN team is currently meeting with colleagues from the Royal Hospitals for Sick Children in Edinburgh and at Yorkhill; the Scottish Adult Congenital Cardiac Service (SACCS) at the Golden Jubilee; special health boards; acute sites across Scotland; patients, carers and voluntary organisations. In the coming months, we plan to meet with relevant people in other areas and sectors too.

The SCCN will present at a meeting of the Scottish Parliament Cross-Party Group on Heart Disease & Stroke on 18 Sept. The focus of this meeting will be Adult Congenital Heart Disease. There are a limited number of places for patients/ carers to attend. If you are interested, please email louise.peardon@chss.org.uk
